Processing Policies Description

- 2145** Restorations are not allowable on a tooth with an existing crown.
- 3799** Per Dental Director Review, periodontal scaling and root planing is denied due to no evidence of significant bone loss. Demonstrating radiographic evidence of root surface calculus, apical to the CEJ, and/or bone loss is necessary to indicate a true periodontic disease state. When there is no root surface calculus or bone loss; or there is generalized moderate to severe gingival inflammation with no attachment or bone loss, prophylaxis, scaling in the presence of inflammation, or full mouth debridement may be considered for addressing the patient's gingival health needs.
